

ESSENTIAL PHARMA

Essential Pharma is a UK-headquartered specialty pharmaceutical company focused on specialty care and rare diseases. For more than four decades, it has worked to keep critical medicines within reach of patients, including small patient groups where need is high and options are few. Its medicines reach patients in more than 70 countries. Essential Pharma has in-house research and development, with its first clinical programme in paediatric oncology within rare disease.

Two companies. One commitment to UK patients.

Nordmark is a family-owned fully integrated pharmaceutical company based in Uetersen, Germany. It specialises in developing and manufacturing active ingredients and medicines of biological and biotechnological origin and it has a growing footprint in biotechnology. Its expertise covers the full process, from developing to manufacturing active ingredients and finished medicines, underpinned by rigorous quality management. Nordmark works with pharmaceutical partners worldwide, from development through to approval.
