

# HPB Endoscopy Beyond Limits

## Elevate Patient Outcomes with our Advanced Solutions

Olympus is pushing the boundaries of HPB care with advanced image enhancement technologies from the EU-ME3 and the Aplio i800 EUS for precise diagnosis. And for treatment, our TJF-Q290V duodenoscope and EndoTherapy devices are designed to meet your therapeutic needs.

In addition, we offer world-class training courses led by medical experts, with support from our dedicated professional education team, along with in-person guidance from clinical application, and INFOCUS service specialists, to ensure your devices are maintained at every step.
